Sitting at 2035 metres, Sestriere is located less than two hours from Turin, and is part of the Via Lattea or "Milky Way" ski area giving 400km of pistes. The Fiat boss Giovanni Agnelli developed the town in the 1930's creating Europe's first purpose-built ski resort. The town may lack a little charm, but it serves its purpose as one of the best locations for skiing in Italy.

We have booked fourteen places at the ****Hotel Du Col which is highly rated for giving excellent value for money.

Few other places in Europe can claim to be better for skiing and snowboarding. Sestriere's own area has beginner slopes which fan out from the ski school meeting place. It's a great place for intermediates, who can choose anything from long cruising runs to mogul fields. For experts there are a number of black runs with lots more skiing in the linked Milky Way resorts with snowsure runs located mostly on north-west facing slopes.

Not only great for skiing, but also a gastronomic delight, Sestriere is the place to go for a great time of skiing, food and fun.
